5B5870 COMBINATORIAL OPTIMIZATION Spring 2007
Instructor: Anders Forsgren

General Rules for Homework Assignments

- Each student has to hand in individual solutions. Please state name and personal number.

- You are encouraged to use suitable computer programs, such as Matlab, for computations and drawing pictures.

- You may cooperate, but first make a try on your own. Discussions are encouraged. If you receive help from someone, say so in your solutions.

- You are not allowed to copy solutions form others.

- Late assignments are not accepted. Please observe the due dates.

Good luck!
